EBBEJU LANKAPALLI

AI / Machine Learning Engineer | Full-Stack Developer | B.Tech CSE (AI & ML), 2027
Vijayawada, Andhra Pradesh, India | ebbejulankapalli@gmail.com | +91 7396774148
GitHub | Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Computer Science (AI & ML) undergraduate with hands-on experience across machine learning, deep learning, generative AI, agentic workflows and full-stack development. Built applications for fraud detection, lead management and insurance claim pre-assessment, spanning predictive modeling, document intelligence, retrieval-augmented generation and user-facing AI. Skilled in Python, SQL, scikit-learn, FastAPI, React.js, Node.js and Express.js; experienced in data pipelines, model evaluation and LLM integration.

PROFESSIONAL EXPERIENCE

Artificial Intelligence Intern | App Genesis Soft Solutions Pvt. Ltd. | 11 May – 30 June 2026 | Certificate

- Applied Python, Pandas, NumPy and scikit-learn to data preprocessing, exploratory data analysis and feature engineering.
- Worked with classification, regression and clustering techniques for predictive modeling; evaluated models using appropriate performance metrics.

SELECTED PROJECTS

Financial Fraud Detection System | GitHub

- Built a CatBoost fraud detection system on the IEEE-CIS dataset; achieved 88.51% ROC-AUC and 47.78% F1 on a chronological held-out test set (96.91% accuracy).
- Implemented a 20-feature inference pipeline with a validation-selected threshold, FastAPI endpoints, PostgreSQL and a React analytics dashboard.
- Added a Groq-powered investigation assistant while retaining CatBoost as the decision layer; documented 21 passing backend tests.

OmniLead AI | GitHub

- Developed a full-stack omnichannel lead-management platform for customer records, sales pipelines, lead prioritization, follow-ups and analytics.
- Built React interfaces and FastAPI services with PostgreSQL, SQLAlchemy and Alembic; integrated AI-assisted scoring, semantic search and sales insights using Gemini, LangGraph and embeddings.
- Implemented structured background processing with Redis and Celery.

NexClaim Nexus | GitHub

- Created an AI-assisted insurance claim pre-assessment application with policyholder, reviewer and administrator workflows.
- Integrated Tesseract OCR and PDF extraction to capture document fields, validate policy rules and classify claim risk as LOW, MEDIUM or HIGH with confidence scores.
- Built explainable pre-assessment recommendations and human review workflows using FastAPI, Pydantic, SQLAlchemy and JWT authentication.

TECHNICAL SKILLS

Programming: Python, SQL, C, C++, JavaScript, Node.js, Express.js, React.js

Machine Learning & Data: scikit-learn, CatBoost, PyTorch, Pandas, NumPy, Matplotlib, EDA, feature engineering, classification, regression, clustering, PCA, model evaluation

Generative & Agentic AI: LLMs, RAG, LangChain, LangGraph, Google Gemini, Groq, embeddings, prompt engineering, MCP

Frontend: React.js, HTML, CSS, JavaScript, Vite

Backend & Databases: Python, FastAPI, Node.js, Express.js, REST APIs, PostgreSQL, MongoDB, Supabase, SQLAlchemy, Alembic

Tools: Docker, Git, GitHub, Pytest, Redis, Celery, Jupyter Notebook, Google Colab

EDUCATION

B.Tech, Computer Science and Engineering (AI & ML) | 2023–2027
Dhanekula Institute of Engineering and Technology, Vijayawada, Andhra Pradesh | CGPA: 8.1/10

RELEVANT COURSEWORK

Machine Learning, Deep Learning, Artificial Intelligence, Data Structures & Algorithms, Database Management Systems, Operating Systems
